

Measurement Data Wireless Communication System Mitutoyo Bluetooth® U-WAVE

Bluetooth®

U-WAVE now available with Bluetooth® wireless technology

Small Tool Instruments and Data Management

Easy to Connect

 Manage Measurement Data Centrally and Wirelessly on a Smartphone, Tablet or PC

Mitutoyo Bluetooth® U-WAVE

U-WAVE-TMB/TCB

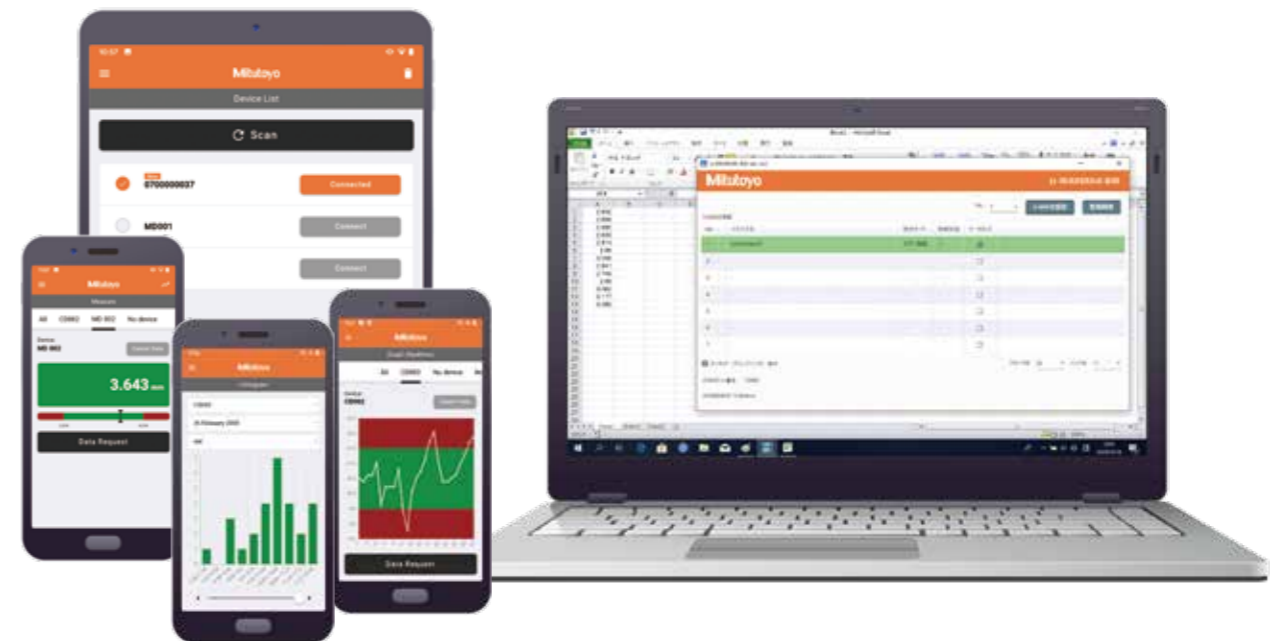

More compact and thinner for a better fit with Digimatic gages, and featuring improved operability and performance inherited from its predecessor, U-WAVE-TMB/TCB is now available with Bluetooth® wireless technology. No receiver is required, and one PC can connect up to seven units of Mitutoyo Bluetooth® U-WAVE. Dust/water-proof models are also available for arduous shop floor usage.

Receiver-less Measurement Data Wireless Communication System

Allows direct measurement data transmission to smartphones, tablets and PCs.

 U-WAVEPAK-BM (English version only), the communication software for transferring measurement data to smartphones and tablets is available at app stores for free download.

U-WAVEPAK-BW, the computer communication software for transferring measurement data to computer software, is available for download from our company's website.

Major Advantages of Introducing Mitutoyo Bluetooth® U-WAVE

Does Not Require a Receiver

Measurement data can be transmitted to PCs, tablets and smartphones without a receiver if they are equipped with Bluetooth® wireless technology.

Cost Reduction Effect

System can be configured at reduced cost, just by connecting to an existing Digimatic gage.

Higher Efficiency

Data can be input by single button operation. Since there is no need for manual input misinput does not occur. Efficiency is greatly improved.

Centralized Data Management

Measurement data can be managed centrally. "Visualization of quality" helps prevent the generation of defective products.

Easy Data Saving

Measurement data can be saved to smartphones and tablets independently of the measurement site.

You can use with confidence since it is labeled with the wireless certification number acquired in the country of purchase.

With Bluetooth® wireless technology for Easy Pairing with Your Digimatic Micrometer or Caliper

U-WAVE-TMB / TCB is compatible with most Digimatic micrometers and calipers. Refer to our company's website for details on product compatibility. https://www.mitutoyo.co.jp/eng/support/service/catalog/10/E12000_appendix.pdf

Configuring the measurement data network system MeasurLink® based on U-WAVE-TMB/TCB

Achieve "Visualization of Quality"

With MeasurLink®

MeasurLink® is an IoT platform for quality management that realizes "Visualization of Quality" by enabling real-time data collection from networked Digimatic gages and global control and analysis. U-WAVE supports MeasurLink® as an infrastructure that collects and controls data.

Preventing defectives

Collects data from Digimatic gages on the network and performs statistical process control (SPC) to warn of possible generation of defectives.

Diagnosis by data analysis

Checking measurement results by accessing the data base and performing various analyses helps investigate and resolve process performance concerns.

Simply start achieving IoT

In addition to conventional data storage, the network can be configured in steps to simply start IoT of Quality Control.

MeasurLink® is a registered trademark of Mitutoyo Corporation in Japan and Mitutoyo America Corporation in the United States.

Whatever your challenges are, Mitutoyo supports you from start to finish.

Mitutoyo is not only a manufacturer of top quality measuring products but one that also offers qualified support for the lifetime of the equipment, backed up by comprehensive services that ensure your staff can make the very best use of the investment.

Apart from the basics of calibration and repair, Mitutoyo offers product and metrology training, as well as IT support for the sophisticated software used in modern measuring technology. We can also design, build, test and deliver measuring solutions and even, if deemed cost-effective, take your critical measurement challenges in-house on a sub-contract basis.
